Inventor: Curtis Jude Martin
Address: 1675 East Main Street - Kent, Ohio 44240-5818 - USA
Title of Invention: E.V.E. Emergency Vehicle Environment

System and devices for creating an emergency vehicle environment

Abstract

A system of dedicated channel FM devices for unobstructing the path of emergency vehicles resulting in increased response times and safety. The devices include a small radio receiver in a passenger vehicle and/or in a traffic light fixture that actuates an intermittent warning light when it receives an appropriate signal from a transmitter in an emergency vehicle. The small radio transmitter on or in the emergency vehicle is automatically actuated by the use of the siren in the emergency vehicle.

Claims

What the invention disclosed is:

1. a broadcasting system using frequency modulation to create an Emergency Vehicle Environment (EVE) for unobstructing the path of emergency vehicles.

2. a small radio transmitter - externally and internally
